WORK EXPERIENCE

Software Engineer

September 2025–Present

Forsa Property forsaprop.com

Full-time

- Manage the company's **flagship real estate marketplace** end-to-end, self-hosted on Linux behind Cloudflare.
- Built the **container deployment platform in-house**, bringing blue-green deploys, autoscaling, zero-downtime cutover, and instant rollback to the team.
- Build CRM and White-Label Marketplace for internal/B2B use.
- Drive **Enterprise SEO and performance**, making every property listing **server-rendered and crawlable** while tuning the delivery path to keep pages fast at scale.
- Own **platform security**, hardening every layer from the network edge to application code.
- Led a **team of junior engineers**, owning architecture decisions, code reviews, and the release process while partnering with product and stakeholders on the roadmap in agile sprints.

Freelance Software Developer

July 2025–September 2025

Forsa Property forsaprop.com

Freelance

- Scoped, architected, and shipped the real estate website and admin panel from scratch in **2 months** as sole engineer on the MVP.
- Delivery converted into a full-time software engineering offer.

EDUCATION

B.Sc. in Media Engineering and Technology, CSEN Major

2020–2025

German University in Cairo ojee.net/bsc

Graduate

- Exchange Semester in Berlin at **German International University**.
- Thesis Paper: ***Algebraic Logic of Secrets***, a formal framework for reasoning about secrecy in multi-agent systems.

PROJECTS

- Built **ojee.net**, a portfolio with custom **WebGL/GLSL** backgrounds, interactive demos, and SSR-driven SEO.
- Built **pitvisor**, an F1 race analytics platform with interactive visualisations and a Discord bot, on **Python and React**.
- Built **ojee-console**, a tailnet-only control shell on **Tailscale and TOTP** auth, mounting independent modules for a home dashboard, browser remote desktop, laptop hardware control, and an AI agent surface.
- Built **Secrets Simulator**, an interactive model checker turning every axiom and theorem of the Algebraic Logic of Secrets into a checkable predicate, in **React**.

SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, Python, Java, C, C++, C#

Frameworks: React, Node.js, Express, Flask, Tailwind, Socket.io, Capacitor, Vite, WebGL/GLSL, PyQt5, Recharts, KaTeX

Data: MongoDB, Firebase, SQL

Cloud & DevOps: AWS, Cloudflare, Linux, Git, CI/CD, Docker, Tailscale

AI & ML: OpenAI API, Ollama, Hugging Face, n8n

Spoken Languages: Arabic (native), English (fluent), German (A2)
