EXPERIENCE

•Software Engineer

September 2025–Present

Forsa Property forsaprop.com

Full-time

- **Manage the marketplace product end-to-end**: the company's flagship real estate platform (website, admin panel, **Capacitor** mobile app) on **React**, **Node.js**, **Express**, **MongoDB**, **Python**, **REST APIs**, self-hosted on **Linux** behind **Cloudflare** via a container deployment platform I built (blue-green deploys, autoscaling, zero-downtime cutover, instant rollback).
- Own architecture decisions, code reviews, and the release process; partner with product and stakeholders on the roadmap to balance delivery speed with platform stability.
- Build in-progress products: **CRM** for internal/B2B use, a **blog**, plus **n8n** and **agentic AI** for automation and agent orchestration.
- Drive **Enterprise SEO** and performance work (**SSR**, schema.org, meta tags, sitemaps; bundle, query/index tuning, pagination, caching, **CDN**), shipped through automated **CI/CD** pipelines.
- Mentor a junior engineer through PR reviews, shared work hours, and in-person 1:1s as the team grew from 1 to 4; operate in **agile sprints** with regular standups.

•Freelance Software Developer

July 2025–September 2025

Forsa Property forsaprop.com

Freelance

- Sole engineer on the MVP: scoped, architected, and shipped the real estate website and admin panel from scratch in 2 months on the **MERN** stack.
- Delivery converted into a full-time software engineering offer.

EDUCATION

•B.Sc. in Media Engineering and Technology, CSEN Major

2020–2025

German University in Cairo ojee.net/bsc

Graduate

- Semester abroad in Berlin at GIU (Oct 2023 – Feb 2024).
- Thesis: *Algebraic Logic of Secrets* (**A+**), a formal framework for reasoning about secrecy in multi-agent systems.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, C#

Frameworks: React, Node.js, Express, Tailwind CSS, Socket.io, Capacitor, Vite

Data: MongoDB, Firebase, MySQL

Cloud & DevOps: AWS, Cloudflare, Linux, Git, CI/CD, Docker

Spoken Languages: Arabic (native), English (fluent), German (A2)

PROJECTS

•**Personal Website**: Portfolio with custom **WebGL/GLSL** backgrounds, interactive demos, ojee.net and SSR-driven SEO. Built with **MERN Stack**.

•**pitvisor Dashboard**: F1 data visualization platform with interactive race analytics pitvisor.ojee.net and a Discord bot. Built with **Python**, **Flask**, **FastF1**, **React**, **Recharts**.

•**Agent Dashboard**: Self-hosted AI agent stack with a custom dashboard for live stats, agent.ojee.net container controls, and a tool-calling chat. Built with **Node.js**, **Ollama**, **n8n**, **Docker**.

•**LOQ Control**: Linux control center for Lenovo LOQ laptops. Thermal/fan monitoring, loq-control power profiles, GPU overclock, battery tools. Built with **Python**, **PyQt5**.

•**Secrets Dashboard**: Interactive model checker for the Algebraic Logic of Secrets, secrets.ojee.net every axiom/theorem as a checkable predicate. Built with **React**, **KaTeX**.
